Hi I sent the below email a while ago to you. After it I received a phone call telling me someone was going to come out and give us our test results or at least some of them. They never showed up and we never heard back from you or anyone else. I've talked to other people who had water testing done after ours and have already gotten results. Will you please email ours to us? I'm sure you are very busy and I understand that. We happen to be living in a very odd situation and the results would help a lot.

Thank you,

In the email you sent me it said that some of the water tests would be back within 5 days. Can you please tell me when we will get them? If you want you can just email them to me. If this treatment system is fine for our family then the other families shouldn't be refusing to take one. They also should not be provided with water. I sent you two links that I don't know if you've seen or not. These poor children have no idea the real story here and have done/continue to do quite a bit for these people. We really feel if these people actually wanted to have their water fixed they would have at the very least attempted with the treatment system. If the treatment system didn't work they would have let the company try and try again until it did work. If your water was bad wouldn't you let the company try to fix it? It seems that it isn't about clean water it's just about money.

Thank you,
